Damascus by Hâws

## Chef knife

The sharp blade of the Damascus by Hâws Chef knife is made of 67 layers of Damascus steel, ensuring you the best cutting experience. The handle of the knife is designed to fit perfectly in your hand, allowing you to use the knife for extended periods without any problems.

Damascus steel is characterized by its beautiful pattern, which arises from a unique forging method where many layers of steel are forged together to create the unique structure. But it's not just the pattern that makes Damascus knives so unique.

On the HRC scale, a standard kitchen knife has a hardness of 50-55, whereas Damascus knives have an HRC of 59-60, which is a very high value. A high HRC says a lot about the good quality of the steel as well as its durability. The better the quality of the steel, the longer the lifespan of your knife. With the Damascus by Hâws Chef knife in your kitchen, you can be sure to have knives of the highest quality that hold their sharpness longer than standard kitchen knives. Comes in a beautiful black gift box.

### TECHNICAL DATA

Item number: 30-DHB005  
EAN number: 5712087103295  
Product: 33.5 cm  
Salesunit (LxWxH): 3.6 x 38.9 x 9.1 cm  
Material: G10 composite + steel
