SHARK POWERDETECT NEVER-TOUCH 2-IN-1 RV2800YEEU

Say goodbye to daily cleaning hassles and let the Shark PowerDetect NeverTouch 2-in-1 Self-Empty & Self-Refill Robot Vacuum & Mop take over. This intelligent robot deep cleans all floor types and thanks to its NeverTouch base, it automatically empties dirt and refills itself with clean water. This means up to 30 days of maintenance-free cleaning.

With advanced technologies like PowerDetect, it optimises cleaning by adjusting to your home, increasing suction power on dirty areas and avoiding obstacles. Meanwhile, precision mapping with 360° LiDAR ensures that your robot methodically cleans every corner, day or night.

The robot seamlessly switches between vacuuming and mopping and lifts the mop to avoid wet carpets. The mop cloth dries automatically after use and the Anti-Allergen Complete Seal captures and traps up to 99.9%* of dust and allergens - ideal for pet owners and allergy sufferers.

Controlled via the SharkClean app or voice control, you can easily customise cleaning to your needs. With up to 110 minutes of runtime** and self-charging, Shark NeverTouch takes care of the cleaning while you enjoy your time.

Give your home the treatment it deserves - experience the future of cleaning with Shark NeverTouch!

**Based on IEC standard 62885-2 Cl. 5.14 at 0.3 to 10 microns.*

***In low suction mode on hard floors.*
