## SEJERØ 2.0 DOUBLE SMART FRYER 2 x 4,5 L (9L)

With Hâws double smart fryer you get the choice to have crispy and tender food without the high calories and large amounts of oil. Airfry technology is the term for a hot smart fryer that uses up to 75% less oil when cooking. The air in the smart fryer circulates faster and cooking time is therefore shortened compared to a traditional oven. The shortened cooking time can save on your electricity bill

The product has a capacity of 9L divided into 2 baskets with 4.5L capacity in each. This means you can cook 2 meals at once. The temperature is adjustable from 80-200 degrees. The product sounds when a programme is finished and also has an auto shut-off and overheating protection.

Smart finish function: you can start different foods in the two baskets with different cooking times and temperatures at the same time. Even if the cooking methods have different times, the Smart Finish function ensures that both are finished cooking at the same time.

Match Cook-function: is designed to have the same food in both baskets (e.g. twice as many fries), with the baskets set identically with just a few clicks, so the contents are ready at the same time.

The product can cook meat, vegetables, cakes and much more. Only the imagination sets the limits for this product.

The coating is ILAG and it is PFAS free.
