DIGITAL KETTLE

DIGITAL KETTLE

Precision and Elegance in One

Make everyday life easier and more stylish with the digital kettle from Hâws – an elegant and functional choice for the modern Scandinavian home. Crafted in matte stainless steel, the kettle features a concealed heating element and an ergonomic design that seamlessly combines aesthetics with high-level safety.

With five preset temperature levels ranging from 40 to 100 degrees, you can easily select the ideal temperature for everything from green tea and coffee to baby formula. The digital LED display offers a clear overview of both the current temperature and your selected settings, while the intuitive touch control makes it effortless to use in a busy routine.

A convenient keep-warm function maintains the desired temperature for up to 30 minutes and automatically reheats if the temperature drops. Safety is carefully considered in every detail, with automatic shut-off in the event of dry boiling, overheating, or when the kettle is lifted. Additionally, a special construction ensures that any overflow is safely directed away from electrical components.

The Hâws kettle is energy-efficient, technologically advanced, and beautifully designed – perfect for both home and office use.

CAPACITY: 1.7 L
